**Muscle Group: Chest**

**Machine Exercise: Chest Press**

1. Pull out the handle for adjustment of the weight.
2. Pull the handle up to adjust the seat height. The handles should be aligned with the shoulders.
3. Push the pedal with the feet to move the handles forward.
4. Hold the handles with both arms. Keep the back straight with both feet on the ground.
5. Press the handles forward while straightening the arms. Keep the arms a little bent at the end, not locking the elbow joints.
Muscle Group: Chest

Machine Exercise: Chest Press

Pull out the handle for adjustment of the weight.

Free Weight Exercise

Dumbbell Bench Press

Lie down on a flat bench with a dumbbell in each hand resting on top of your thighs. Then, using your thighs to help raise the dumbbells up in front of you at shoulder width.

Use your chest to push the dumbbells up. Lock your arms at the top of the lift and squeeze your chest, hold for a second and then begin coming down slowly.

Barbell Bench Press

Lie back on a flat bench with feet firm on the floor. Using a wide, pronated (palms forward) grip, lift the bar and hold it straight over you with your arms locked. The bar will be perpendicular to the torso and the floor. As you breathe in, come down slowly until you feel the bar on your middle chest.

After a second pause, bring the bar back to the starting position as you breathe out and push the bar using your chest muscles. Lock your arms and squeeze your chest in the contracted position, hold for a second and then start coming down slowly again.
